**NOTES**

These plans have been prepared for Building Permit Application only. It is the Builders/Owners responsibility to further inspect the design and drawings to detail the project for construction. Builder shall verify all location of services, dimensions and levels prior to construction. Setout dimensions on site shall be confirmed by Builder before the commencement of construction & ordering. Amend setout if necessary to comply with Council by-laws and setback distances. During construction the building shall be maintained and no part shall be overstressed.
